

1. All source files should be in the src/ directory, all test files should be in the tests/ directory
2. Filename: Filenames must be in camelcase and each word's first letter must be capitalized. Example: AccountPage.js
3. Block indentation +2 spaces
4. Declare all local variables with either const or let. Use const by default, unless a variable needs to be reassigned. The var keyword must not be used.
5. Use identity operators (===/!==)
6. Each page has its own css file
7. Do not use static container classes
8. Use kebab-case for CSS class names
9. Conditional Rendering: Uses conditional rendering to handle different states, e.g.,
{loading ? <p>Loading...</p> : ...}
10. All buttons have a type attribute

Definition of Done:

- Code is complete and according to development team standards
- Code is in the repository
- Peer reviewed
- No Dependencies unattended
- No build failures
- Continuous Integration Testing Passed
- No errors in coding standards
- Documentation Completed
