Sprint 3 Report, Slugmart, 11/18/24

Actions to stop doing: Make sure all documents match up with things we got done/other documents so there is no confusion when writing. The team should stop having meetings at inconvenient times so everybody can join the meeting for at least 15 minutes. Stick to a coding convention so pages that aren't supposed to interact with each other interact with each other.

Actions to start doing: Start finishing documents before we start implementing features so the team has a common understanding of what we are trying to achieve each sprint. Also, start having meetings at 7:00 so everyone can make it and stay for a bit longer. Refactor code whenever there are commonalities, functions should be in CamelCase, have a standard coding method

Actions to keep doing: We should keep having 3 meetings per week and live coding sessions/collaboration on documents so we are all on the same page. When we all are on call, we catch up on who did what and assign tasks for each individual to do by the next meeting. We should continue helping people understand what we implemented and how it works so other team members can add to it.

Work Completed:
- As A UCSC student, I want to be able to view other people's items via a filter
- As a UCSC student, I want to be able to edit my postings price and images

Work Uncompleted:

Work Completion Rate:
- **Total Number of User Stories Completed: 2**
- **Total Number of Estimated Ideal Work Hours: 70**
- **Total Number of Days: 14**
- **User Stories Per Day: .**
- **Ideal Work Hours Per Day: 3 hours/day**
- **Final Sprint Burnup Chart:**
